

INVIO

Making health billing easier

Discover the proven billing automation solution that is delivering sustained value for more than 40 hospitals across Australia.

Running a hospital is challenging enough without persevering with manual billing processes.

Too many wasted hours manually uploading data and cross-referencing numbers

Too many human error mistakes to ensure the correct rules apply to which health funds

Too many cash inflow delays waiting for clinical staff to input forms

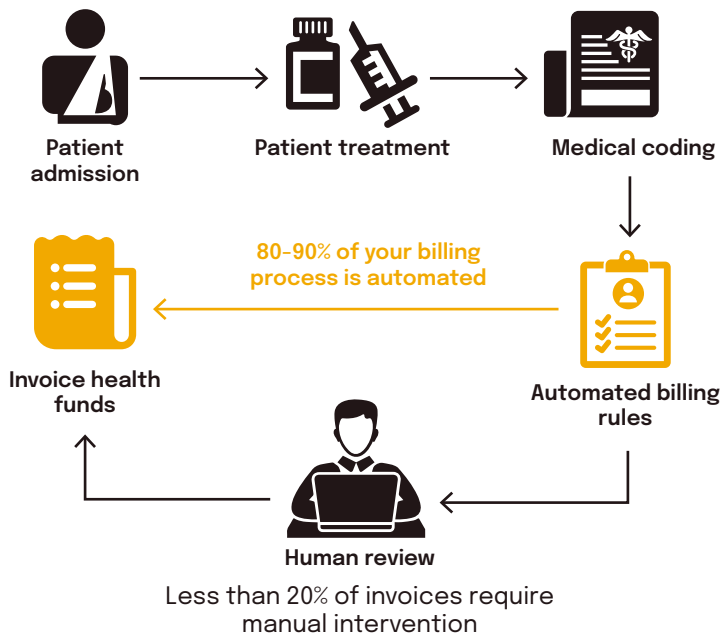

Too much unrealised revenue when every dollar counts

It is time to embrace the INVIO difference.

How INVIO works

Our automated health fund billing solution has been custom-built for the Australian healthcare industry and integrates with your patient administration system to automatically find, validate and raise invoices, increasing accuracy and eliminating hours of manual processing.

1. Integrates with a variety of patient administration systems including WebPAS, FYDO, Medical Wizard, EPAS, MedicalDirector and Genie to name a few.
2. Finds pending invoices with coding complete
3. Validates data and checks business rules to ensure health fund rule compliance
4. Finalises processing and raises invoices automatically

Why INVIO is a winner

- ✓ **Increases revenue** – Invio automatically identifies health fund rule checks to reduce financial leakage
- ✓ **Improves cashflow** – Invio automates billing processes to reduce write-offs, improve payment timeframes and boost the speed and scope of health fund cash inflows
- ✓ **Boosts compliance** – Invio uses automated checks, flags and alerts to monitor end-to-end compliance and immediately notify staff of exceptions.

INVIO - powered by Innovior

Optimise
your hospital
